Virtual Collaboration Tools & Tips for Greater Productivity
May 14, 2020 • 3:00pm

Learn about essential tools and tips to improve your company's virtual collaboration capabilities and be more productive. Whether you are an avid user of collaboration tools or brand new to them, join TechWorx, one of the region's top IT managed services, cloud and cybersecurity providers, to understand best practices for collaborating both internally and externally. TechWorx will walk through common tools that are available to improve communication and collaboration on projects and/or with clients. They will also highlight areas of concern to minimize data breaches while collaborating.

TechWorx will cover:
- Overview of common collaborative tools
- Best practices for sharing data securely
- How to prevent 'Shadow IT'
- Tips for running a video conference meeting

In addition, TechWorx is offering a free video conferencing call guide for you and a collaboration tool assessment for your business.

The coronavirus was an unplanned catalyst that stress tested every company's business continuity and remote workforce plans. Many companies were prepared for the shift to working full time remotely and many were not. It became abundantly clear that there was a competitive advantage to those companies who already had leveraged remote work practices and those that were learning it on the fly. TechWorx, one of the region's top IT managed services, cloud and cybersecurity providers, will discuss the evolution of business continuity and the 'new normal' from an IT perspective.

TechWorx will cover:
- Technology tools to create an agile company
- Ways technology can provide a competitive advantage
- Tips on keeping a remote workforce productive
- How to evaluate in improve the technology portion of your business continuity plan

In addition, TechWorx is offering a free vulnerability test and IT business continuity assessment for your business.
